

## Craig Dube

### Systems Engineering

Telephone: 207-866-7600

Email: [cdube@hrstinc.com](mailto:cdube@hrstinc.com)

Craig joined the HRST team in 2007, providing hands-on boiler operating expertise to our capabilities. His duties include boiler inspections, design reviews, outage technical advisor, FAC studies and “hands-on” operator training.

- ◆ **Duke Energy - Casco Bay Energy Company LLC**—during the 8 years with this company, Craig commissioned and performed control room operations of their 2x1, 520MW combined cycle facility. He wrote and updated operator procedures, trained new operators and visiting operators from other combined cycle plants under construction, domestically and internationally. Periodically, he was dispatched to new combined cycle facilities to provide hands-on commissioning, operator training and reliability improvement of their HRSG's.
- ◆ **Indeck Energy Services**—during the 2 years with this company Craig performed operational duties on combined cycle and fluid-bed power boiler power plants, as well as participating in a traveling services group performing combustion turbine maintenance.

## EDUCATION

Maine Maritime Academy, Castine, ME

- ◇ BS Power Engineering Technology—1997

## FIELDS OF SPECIAL COMPETENCE

- ◇ HRSG Inspections
- ◇ FAC Analysis
- ◇ Systems Operations
- ◇ Plant Operator Training
- ◇ Control Room Operator Training

## *PUBLIC SPEAKING*

- ◇ Flow Accelerated Corrosion, Maine Maritime Academy, International Boiler Pressure Vessel Seminar July 2006
- ◇ Combined Cycle Plant Operations, Maine Maritime Academy, International Boiler Pressure Vessel Seminar. July 2004
- ◇ Instructor for Operator Pre-Commissioning Training, Qatar Combined Cycle Facility April 2008
- ◇ F-Class Spotlight Session, Atlanta GA May 2009
- ◇ HRSG Academy—Presentation Topics; Economizers and Preheaters, HRSG Components & Design—Gas Side June 2009
