

Erin E. Olsen
Piping Designer

Telephone: 952-833-1427 ext. 37
Email: eolsen@hrstinc.com

Erin joined HRST in April 2008 as part of the product sales and design team. Within this team, she provides consultation, design and documentation for retrofit projects relating to HRSG's. Erin also participates in research and development of new product and upgrades solutions for plant sites.

- ◆ **Major OEM for Gas Turbine HRSGs**—Erin worked for 7 years with a major OEM, starting in structural layout and ending in piping design. She was responsible for accuracy of the piping drawings & pipe supports with adherence to the P&ID and also to the ASME boiler code. Erin also was responsible for helping to create the 3D model of the HRSG.
- ◆ **Crown Iron Works**—Erin was responsible for creating isometric drawings of the refinery plants. She used her knowledge of 3D modeling to review the isometric drawings for accuracy and repair the 3D model to conform to the P&ID. She was also responsible for creating 3D models of the tanks and structural layouts for the refinery plants.
